

MTN Nigeria

Listing on the Nigerian Stock Exchange

Listing by introduction

MTN Nigeria is to be listed today by introduction to the Nigerian Stock Exchange (NGSE). This is not an initial public offering; no capital is being raised; no commitment has been made by existing shareholders to sell down shares. Liquidity, therefore, is uncertain. This is a pity. MTN Nigeria will be the NGSE's only listed mobile telecom company and will be one of the NGSE's biggest by market capitalisation.

A growth industry

Nigeria's GSM industry has four players: MTN Nigeria, Globacom, Airtel, and 9mobile (the last three unlisted). GSM penetration, at close to 88%, suggests moderate rather than explosive future growth. Total market GSM subscribers grew at a CAGR of 5.2% from Q1 2015 to Q1 2019. The mobile internet subscriber CAGR was 8.0% over the same period, and we think there is significant upside in mobile internet revenues going forward.

A growing company

MTN Nigeria is emerging from a period of turbulence stemming from a regulatory fine imposed in 2015. Now, however, we believe that MTN Nigeria has entered into a period of renewed growth 2019f-22f, not so much backed by GSM growth but by internet subscriber growth and by Data and Mobile Financial Services (MFS).

We model Data subscribers growing at a CAGR 2018e-22f of 5.0% with average revenues per data subscriber growing at a CAGR of 8.5% over the same period. We see total Data revenues growing at a 15.5% CAGR 2018e-22f as a key driver in our forecast of total revenues at a CAGR of 6.2% 2018e-22f.

We forecast positive free cash flows (operating cash flow minus capex) to grow at a CAGR of 9.2% 2018e-22f, leading to a positive net cash position by 2021f. We forecast EBITDA margins trending in a range of 43.0%-44.0% over the forecast period and Net Profits growing at a CAGR of 26.0% 2018e-22f.

Valuation

We value MTN Nigeria using a combination of spot multiple comparisons and a discounted cash flow valuation (DCF). Comparing the EV/EBITDA of MTN Nigeria with emerging market peers brings us a target price of N107.1/share. Our DCF valuation generates a value of N110.1/share. We take as our target price the simple average of N108.6/share. Given a listing price of N90.0/share this implies 20.7% potential upside.

Forecast Profit & Loss 2018e-22f

Back to Top

We forecast MTN Nigeria's revenues 2018e-22f principally driven by the categories Data and Digital & MFS (Mobile Financial Services). We forecast revenue CAGRs 2018e-22f of: from Data, 15.5%; from Digital & MFS, 9.7%; from Voice Services, 3.6%. Overall, given the weight of Voice Services in the revenue mix, we see total revenues growing at a CAGR of 6.2% 2018e-22f.

MTN Nigeria: key components of revenues, Naira millions, 2016-22f

Source: MTN Nigeria (historic), Coronation Research (forecasts)

On the cost side, we see Operating Expenses growing at a CAGR of 5.8% 2018e-22f. We see the roll-out of Data, Digital & MFS as a cost-effective route to incremental revenues.

MTN Nigeria: key Profit & Loss elements, Naira millions, 2016-22f

Source: MTN Nigeria, Coronation Research

We see the following CAGRs 2018e-2022f: 6.0% in EBITDA; 5.6% in EBIT; 25.0% in Profits Before Tax (PBT); and 26.0% in Net Profits. Although we do not have a great deal of visibility on net finance charges, we estimate that the combination of cash generation, with the potential to bring down gearing 2018e-22f, and moderating interest rates, are set to bring down net finance charges significantly over the forecast period 2018e-22f.

MTN Nigeria Regulatory Fine

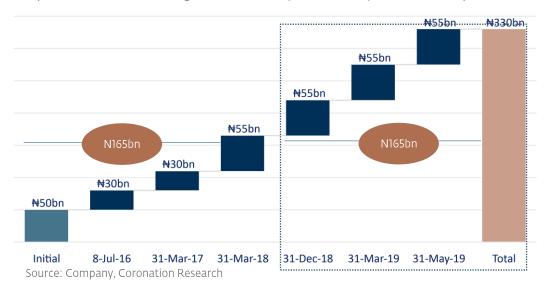

Back to Top 1

In October 2015, the Nigerian Communications Commission (NCC), enforcing the provisions of Section 20 (1) of the Registration of Telephone Subscribers Regulation of 2011, levied a fine of US\$5.2bn against MTN Nigeria for failing to deactivate 5.2million Subscriber Identification Modules (SIMs) flagged by the regulator as activated, but with improper registration.

MTN Nigeria acknowledged its infraction and sought an amenable resolution, employing diplomatic and legal channels to broker a softer penalty. After initial negotiations between MTN Nigeria and the Federal Government of Nigeria (FGN), the penalty, was reduced to N674bn.

MTN Nigeria contested the reduced amount in court in a bid to secure better terms and cushion the effect of the penalty on its profits and cashflow. After exploring litigation, MTN Nigeria resolved to reach an out of court settlement with the NCC, making a \$250m (N50bn at the time) advance payment in February 2016, to the regulator as a show of good faith, before the terms of the revised fine was determined.

Following extensive negotiations, a compromise with the regulator was reached, reducing the penalty to the presently agreed fine of NGN330bn. The fine represented 4.22x the total equity of MTN Nigeria (NGN78.17bn) as at December 2016 and 32.16% of total assets for the same period.

MTN Nigeria structured a six-instalment payment plan spanning three years to fully amortize the fine. The amount to be amortized is net of the initial Naira 50 billion payment, bringing the outstanding fine to Naira 280 billion as at Q1 2016. According to the NCC, MTN Nigeria had made a total payment of Naira 165 billion as at Q1 2018 towards the settlement of the fine. This is in line with the terms of the agreed payment schedule.

The FGN also extracted a firm commitment from the MTN Group (not covered) to list its Nigerian subsidiary on the Nigerian Stock Exchange when "commercially and legally possible".

MTN Nigeria Regulatory Fine

Back to Top 1

Fine treatment

On the accounting treatment of the fine MTN Nigeria had, in 2015, prudently set aside provisions for the contingent liability.

A breakdown of MTN Nigeria's financials shows the company in 2015 had made an initial provision recognition of N275bn for the fine. This provision was remeasured in 2016 resulting in a writeback of N20bn.

We are not entirely clear on the accounting of payments to the NCC going forward. We understand that a portion of provisions had been made in 2015 (with some writeback in 2016). We also understand, according to management, that all payments to the NCC, going forward, are only cashflow items and do not impact the P&L. We have reflected this in our cashflow forecasts.

The Nigerian GSM market 2014-18

Back to Top 1

What is a subscriber?

To comprehend Nigerian GSM subscriber numbers, it is important to understand that a 'subscriber' in Nigeria is not a subscriber in the sense used in developed markets. Much, if not most, GSM charges in Nigeria are pre-paid. And, among affluent customers, possession of two, three or more devices, each with its own SIM, is common. This helps explain, in our view, penetration rates (around 88%) and recent (2017) volatility in subscriber data as companies like MTN Nigeria cleaned up subscriber lists by removing inactive subscribers.

Registration of subscribers has been a contentious issue (which in MTN Nigeria's case we explain in a separate section), and in the past resulted in excess subscriber onboarding, without the required registration, which was later reversed under regulatory pressure in 2015 and (in our opinion) 2016. MTN Nigeria was required to disconnect 5.2m subscribers.

Total GSM subscribers, millions, Nigeria 2014-Q1 2019

Source: Nigerian Communications Commission (NCC), Coronation Research

Overall growth in GSM subscribers took place at a CAGR of 5.2% from Q1 2015 to Q1 2019. This trend overcame the de-registrations in 2015 that were ordered by the regulator. The curious feature of this growth was the dramatic fall in subscriber numbers in the middle of this period.

Fall in subscriber numbers, 2017

Using NCC data, from January 2017 to July 2017 the total number of GSM subscribers in Nigeria fell by 15.9 million, or 10.3%, from 154.7 million to 138.7 million (see chart).

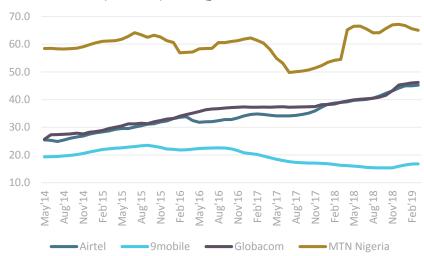

This was largely driven by MTN Nigeria which shed 12.5m subscribers (20.1% of its base using NCC data). Two other mobile telecom companies also lost subscribers during this period. Etisalat/9mobile lost 2.9 million subscribers (-14.2%), Airtel lost 0.6 million subscribers (-1.6%), while Globacom made a small gain of 20,000 subscribers (+0.1%).

The decline in subscriber numbers in 2017 was principally driven by a deliberate policy of removing inactive subscribers, as MTN Nigeria itself has described. The recession of 2016 may also have played a small part in this process.

Back to Top

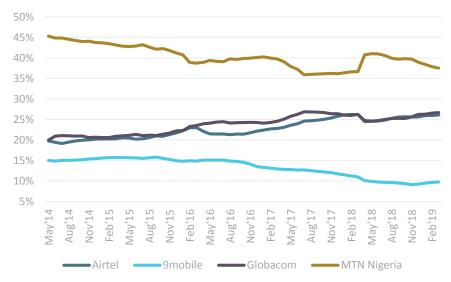

Source: NCC, Coronation Research

From the above, it follows that MTN Nigeria's loss of subscribers in 2017 did not result in significant transfers of business to its competitors. MTN Nigeria's subscriber losses can be considered as losses of excess and inactive subscribers, in our view.

MTN Nigeria's total revenues in fact grew by 11.5% year-on-year in 2017 (2017 average CPI: 16.6%), and within these revenue numbers, Voice Service revenues (excluding interconnect) grew by 9.3% year-on-year.

GSM subscriber market share, 2014-2019

Source: NCC, Coronation Research

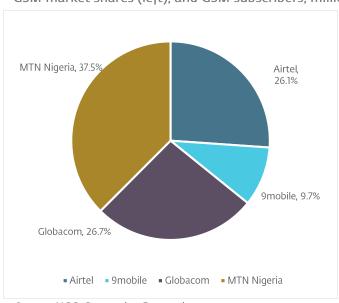

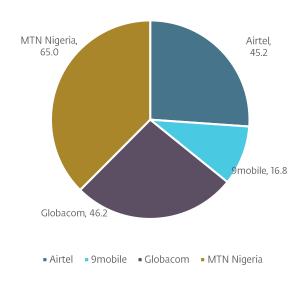

The Nigerian GSM market in 2019 and beyond

Back to Top 1

MTN Nigeria's situation stabilised in H2 2017, in our view, and a re-bound followed in 2018. MTN Nigeria remains the largest Nigerian mobile telecom company by subscribers, according to industry data for Q1 2019. (Revenue data for MTN Nigeria's competitors is not available.)

GSM market shares (left), and GSM subscribers, millions (right), Q1 2019

Source: NCC, Coronation Research

Our understanding of MTN Nigeria's situation by the middle of last year is as follows: MTN Nigeria had resolved the subscriber non-registration issue; the deliberate reduction in subscribers, which was a feature of 2017, was behind it; it enjoyed a short (by which we mean one year) period of recovery; and it has entered a period of renewed underlying growth, 2019f-22f.

Forecast period 2019f-22f

To a significant extent, in our view, MTN Nigeria's 2018 gains in GSM subscribers reflect a recovery from the retrenchment of early 2017. By the same token, the trend 2014-18 was negatively influenced both by the required disconnection process in 2015 and by the recession of 2016 (a 1.58% fall in GDP) and of Q1 2017 (a 0.91% fall in GDP, y/y). Going forward we expect much more moderate growth in subscribers given current levels of penetration.

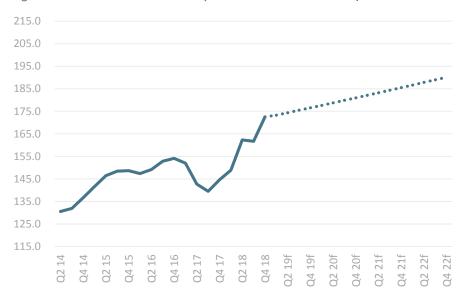

The Nigerian GSM market 2019f-22f

Back to Top 1

We see overall GSM subscriber levels growing at 2.0% year-on-year during the forecast period 2019f-22f (i.e. a little lower than population growth which we forecast at 2.6% per annum 2019f-22f).

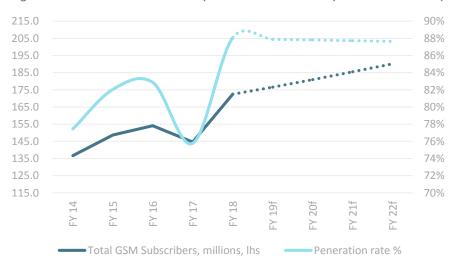

Nigerian GSM subscriber development, millions, 2014-22f

Source: NCC, Coronation Research

We forecast GSM penetration rates falling slightly over the forecast period.

Nigerian GSM subscriber development, millions, and penetration rate (rhs), 2014-22f

Source: NCC, Coronation Research

In the forecast period 2019f-22f, we think that it will be the combination of tariffs, internet penetration, digital and mobile financial services revenue growth that will drive revenue development.

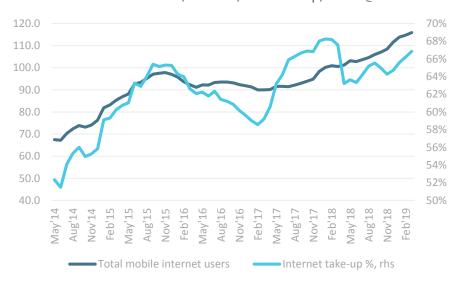

The Nigerian mobile internet market 2014- Q1 2019

Back to Top 1

Nigeria's mobile internet market registered a 8.0% CAGR in users from Q1 2015 to Q1 2019, much faster than the 5.2% CAGR in GSM subscribers over the same period. Percentage take-up rose from 60% in Q1 2015 to 67% at O1 2019.

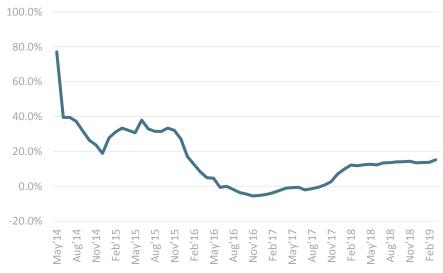

Total mobile internet users, millions, and take-up, 2014-Q1 2019

Source: NCC, Coronation Research

Growth rates have been volatile. In the early period of mobile internet development growth rates were, unsurprisingly, very high.

Year-on-year mobile internet growth 2014-Q1 2019

Source: NCC, Coronation Research

And there have been periods of contraction. The entire period from June 2016 to September 2017 recorded, each month, small year-on-year falls in mobile internet users.

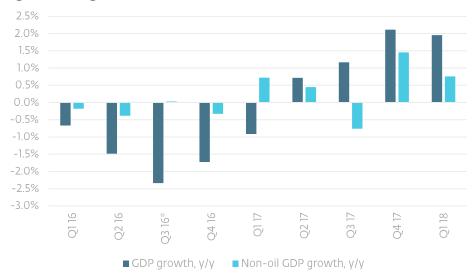

Competition in mobile internet

Back to Top 1

This 16-month period of small falls in mobile internet users coincided, with a delay of approximately two quarters, with the recession in the Nigerian economy as a whole (the recession took place from Q1 2016 to Q1 2017, inclusive).

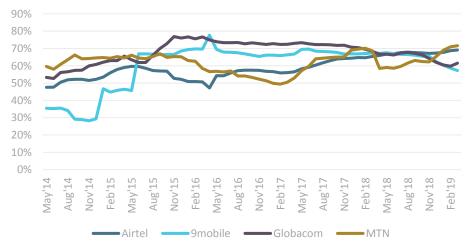

Nigerian GDP growth, Q1 2015 - Q1 2018

Source: National Bureau of Statistics (NBS), Coronation Research

The falls in internet use may have been due to falls in business activity overall, and, as we think, low levels of expenditure on internet channels by businesses.

Percentage internet take-up, by company, 2014-Q1 2019

Source: NCC, Coronation Research

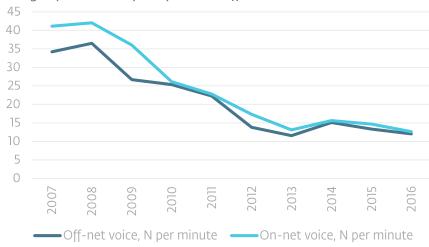

Another, remarkable, feature of internet usage is that the four GSM companies have very similar levels of internet take-up, ranging from 65% for Airtel to 69% for MTN Nigeria. Mobile internet market shares do not differ significantly from GSM subscriber market shares.

Back to Top 1

Due to competitive pressures Nigerian mobile tariffs fell sharply over the period 2007-16. The annual compound rate in tariff decline over this period was 11.0% nominal. However, the rate of decline ameliorated significantly around 2013. From 2013 to 2016 the on-net (same network) tariff fell by an annual compound rate of just 1.2% nominal, while the off-net (one network to another) tariff actually grew by a CAGR of 1.3%.

Average system-wide peak period tariffs, 2007-16

Source: NCC, Coronation Research

It is important not to read across directly from tariffs to average revenue per user (ARPU). For example, MTN Nigeria's voice ARPU rose by 0.5% y/y in 2016 when, in the GSM system as a whole, off-net tariffs fell by 9.8% and onnet tariffs fell by 13.8%. Sophisticated and well-targeted layering of subscriber offers keeps customers buying services, increases usage of regular and premium services.

Going forward, we see tariff declines in the range of 0.0%-2.00% per annum during the forecast period, but do not believe that such declines equate with falls in revenue per average user (ARPU).

Valuation

Back to Top 1

To derive MTN Nigeria's equity value we combine discounted cash flow (DCF) and relative valuation (RV), applying an equal weighting to both.

DCF Valuation

Using the DCF valuation method, we arrive at an equity value of N2.24tn for the company. Our DCF valuation incorporates the use of a two stage model: the forecast stage (2018e-22f), and perpetuity.

To derive our WACC, we adopt a cost of equity of 21.7% and an after tax cost of debt of 8.8%.

We compute our cost of equity by applying MTN Nigeria's blended cost of existing debt of 12.6%, a market risk premium of 6.0% and a beta of 1.24. The beta was derived by computing MTN Group's unlevered beta and applying it to MTN Nigeria's debt structure. We have assumed a long term growth rate of 7.0% slightly higher than our 2018e-22f revenue CAGR of 6.2%.

WACC assumptions

Cost of Debt (Kd)	
Cost of debt	12.6%
After tax cost of debt	8.8%
Cost of Equity (Ke)

Blended target price per share, Naira		_	107.9

Source: Bloomberg, Coronation Research *EBITDA in 2018 is given in company presentation, Net debt is estimated pending publication of full 2018 financial results.

Using both our peer-group relative spot multiple valuation and our DCF valuation gives us an indicative valuation range of N2.20 trillion to N2.24 trillion, for the equity of MTN Nigeria, and an average price per share of N108.6..

Risks

Back to Top 1

Risks to our investment thesis are evident in: exchange rates, in particular the Naira / US dollar exchange rate; oil prices and production; and other contingent liabilities that may crystalise, in particular the ongoing court case between the Federal Government of Nigeria (FGN) and Process and Industrial Development; insurgencies and security breaches; regulatory risk; macro-economic risk; market risk; interest rate conditions; and management decisions as they affect the performance of MTN Nigeria.

Regulatory risk

MTN Nigeria is regulated by the Nigerian CommunicationS Commission (NCC). The NCC is responsible for a broad range of authorisation for the telecommunications industry in Nigeria, including registration of telephone subscribers, interconnection regulations, operating licences and permits, number portability, termination rates etc. The NCC sets tariffs levels for termination rates, and maximum tariffs for voice service and internet services. The NCC could, in future, set minimum and maximum termination, voice service and internet service rates that significantly affect the economics of Nigerian telecom companies, including MTN Nigeria.

Naira / US dollar exchange rate

In January 2017 the unofficial, or parallel Naira/US\$ rate was N490.00/US\$1 while the interbank Naira/US\$ rate stood at N314.86/US\$1. By mid-August 2017 these rates had converged to approximately N360.00/US\$1. During 2017 the published foreign exchange reserves of the Central Bank of Nigeria (CBN) rose from US\$28.3bn to US\$38.7bn. The CBN's FX reserves are currently reported at US\$44.8bn. Therefore, by the end of 2017, the Naira/US dollar exchange rate had stabilised considerably. However, inflation (April 2019: 11.25% year-on-year) currently above its target of 6 – 9%, represents an ongoing threat to the exchange rate, which continues to be protected by various restrictive rules and controls.

In addition, and over the long term, the Naira/US dollar exchange rate has been subject to periodic dislocations. During periods of severe exchange rate disruption there can be limitation on capital flows and foreign exchange transfers.

Oil prices and production

The average price of oil (Brent) in 2017 was US\$54.75/bbl, while year-to-date in 2018 the average has exceeded US\$65.00/bbl. The Nigerian economy depends on oil prices and production to a significant extent.

Average oil prices (Brent) in 2019 have remained favourable, having averaged US\$66.04/bbl up until 6 May. Nevertheless, a sharp decline in oil prices and/or production, especially below US\$60.00/bbl is likely to distort the implementation of the 2019 budget and confidence in the currency. This, in our opinion, could have destabilising effects on the broader economy and MTN Nigeria.

Political risk – Process and Industrial Development (P&ID)

Process and Industrial Development Limited, a company registered in the British Virgin Islands, currently has a US\$9bn claim against the Federal Government of Nigeria (FGN) over alleged contracts with the Ministry of Petroleum Resources of the FGN to build a natural gas processing plant – see Coronation Research: P&ID's risk to Nigeria, 14 March 2019. Enforcement of this contract through US courts could negatively impact the monetary and fiscal stability of Nigeria.

Risks

Back to Top 1

Political risk - insurgencies

The author(s) of this report are aware of three areas of insurgency in Nigeria: in the north-east of the country, where the so-called 'Boko Haram' group wages a terrorist campaign; in the south-south, particularly the Niger Delta area, where various groups disrupt oil & gas production; in the middle belt and north-west where violent raids by bandits have disturbed economic activity. These insurgencies are chronic and, if any one or more of them worsen, could significantly disrupt the politics and economy of Nigeria.

Macro-economic risk

The authors of this report expect continued growth of the Nigerian economy during the forecast period, but cannot rule out a return to recession. Such a renewed downturn would have negative effects on consumer behaviour and on the profitability of MTN Nigeria

Market risk

The prices of shares listed on the Nigerian Stock Exchange (NSE) are subject to volatility which exceeds that of some developed and emerging markets. While volatility does not equate to risk, as such, market participants may reduce their participation in the Nigerian market if volatility reaches high levels, and this could negatively impact share prices.

Interest rate conditions

The interest rates that apply to MTN Nigeria's debt, in both Naira and US dollars, could change in future and differ from those assumed in building the financial model of our forecast earnings, cash flow development and balance sheet for the company.

Management decisions

As described in this report, the NCC found MTN Nigeria in breach of subscriber registration regulations in 2015. We understand that management changes were made after that breach was discovered, that new governance structures are in place, and that the settlement between the NCC and MTN Nigeria is final. However, we cannot entirely rule out future breaches of regulations or of business best practice.

The analyst(s) and/or Head of Research has (have) produced this report independently of the company or companies, and independently of the issuer of security or securities, covered in this report, and (has) have done so using publicly-available information. Information used in the preparation of this report is believed to be accurate at the time of going to press, though not verified independently. No liability is accepted for errors nor omissions of fact, nor is any warranty given for the reasonableness, accuracy or completeness of the information presented. Market information may have been gathered from different sources, including official and government sources, and processed in arriving at the opinion(s) expressed in this report.

This report is intended as background information for clients of Coronation Merchant Bank Ltd, and clients of its subsidiaries and affiliates, and is not to be read as a solicitation, approval or advice to buy or sell securities.

Neither Coronation Merchant Bank Ltd, its directors, employees and contractors, nor its subsidiaries and affiliates, nor the directors, employees and contractors of its subsidiaries and affiliates, accept(s) responsibility for losses or opportunity costs, whether direct or consequential, that may be incurred as a result of trading, or not trading, in securities covered in this report, or other securities, as a result of any decision taken after reading this report. Clients of Coronation Merchant Bank Ltd, and of its subsidiaries and affiliates, who read this report, should not rely on it for the purposes of making investment decisions and should make their own evaluation of: the potential performance of securities; the risks involved in buying or selling securities; the volatility and liquidity of securities; and of other factors such as interest rates, exchange rates, exchange rate liquidity, trading costs, settlement and custody. Clients of Coronation Merchant Bank Ltd, and of its subsidiaries and affiliates, who read this report, should assess their own investment objectives and financial capacities when taking investment decisions and should consult a relevant financial adviser in these respects.

This report is intended for the clients of Coronation Merchant Bank Ltd, and of its subsidiaries and affiliates. Copying and reproduction of this report, and onward forwarding, is only allowed with the specific permission of Coronation Merchant Bank Ltd, its subsidiaries and affiliates. Receipt of this report does not qualify you as a client of Coronation Merchant Bank Ltd, its subsidiaries and affiliates. If you are in unauthorised receipt of this report you are requested to notify Coronation Merchant Bank Ltd, or one of its subsidiaries or affiliates, and to return or delete the report.

This report is intended for corporate and institutional clients of Coronation Merchant Bank Ltd, and of its subsidiaries and affiliates, where those clients are regulated and professional investment customers and market counterparties. This report is not intended for individual investors.

This report is not intended for distribution to, or use by, any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulations.

Coronation Research is a department within Coronation Asset Management Ltd which supplies research services to Coronation Merchant Bank Ltd, and is ring-fenced with regard to the activities of Coronation Asset Management Ltd. The Head of Research, contractors and employees of Coronation Research do not receive any non-public information regarding the investments or investment objectives of Coronation Asset Management Ltd and do not take part in its internal meetings.

Coronation Merchant Bank Ltd and its subsidiaries are incorporated under the laws of the Federal Government of Nigeria and are licensed by the Central Bank of Nigeria and by the Securities and Exchange Commission of Nigeria.

Your attention is brought to the fact that the analyst(s), and/or Head of Research, mentioned at the beginning of this report is (are) employed by Coronation Merchant Bank Ltd in the Federal Republic of Nigeria, and while subject to the laws of the Federal Republic of Nigeria is (are) not subject, as author(s) of this report, to the laws of other countries, notably the United States of America ('US'), the member states of the European Union ('EU'), or the United Kingdom ('UK', during and after its membership of the EU) as these laws may affect the production, publication and distribution of this report.

Your attention is brought to the fact that the analyst(s), and/or Head of Research, mentioned at the beginning of this report, is (are) not registered or qualified as research analysts with the Financial Industry Regulatory Authority in the US, nor registered with the Financial Conduct Authority of the United Kingdom. No liability for compliance with those laws, with respect to this report, is accepted by Coronation Merchant Bank Ltd, its directors, staff and contractors, or those of its subsidiaries and affiliates.

Where this report is distributed to clients and potential clients of Coronation Merchant Bank Ltd, and of its clients and affiliates, in the European Union ('EU'), including the United Kingdom ('UK'), during and after its membership of the EU, this report is either: a) distributed by virtue of a contract between Coronation Merchant Bank Ltd, its subsidiaries and affiliates, and the client for research services, or: b) distributed as a free sample, for a given period of time, pursuant to a future contract for the sale of research services.

The opinions expressed in this report concerning the company(ies) and securities covered, accurately represent the personal views of the analyst(s) and Head of Research whose names are given at the beginning of the report. No part of the compensation of the analyst(s) and Head of Research mentioned at the beginning of this report is, or will be, related to the views or recommendations(s) given in this report.

Conflicts of Interest

The compensation of the analyst(s), and/or Head of Research, mentioned at the beginning of this report is not linked to the recommendations, forecasts, estimates or opinions expressed in this report, nor to commissions or spreads or other gains generated in trading securities, whether covered in this report or not.

This report is produced by the Research Department of Coronation Merchant Bank Ltd and may be used, after its publication, by other departments of Coronation Merchant Bank Ltd for advisory or trading purposes, or otherwise for the assessment of companies and securities. However, it is the policy of Coronation Merchant Bank Ltd that no department influences the opinions, estimates, forecasts or recommendations of the Research Department, nor is privy to the contents or recommendations of the Research Department's reports and recommendations ahead of their publication. It is also the policy of Coronation Merchant Bank Ltd that members of the Research Department are not privy to knowledge of advisory mandates, or other fiduciary relationships, engaged in by other departments. Coronation Merchant Bank Ltd, its directors, contractors and staff, and its subsidiaries and affiliates and their directors, contractors and staff, and connected parties, may have positions in the securities covered by this report, and may have advisory and/or other fiduciary relationships with companies covered in this report. As such, this report should not be considered free from bias.

Disclosures for companies cited in report

The table below outlines currently known conflicts of interest that may unknowingly bias or affect the objectivity of the analyst(s) with respect to an issuer that is the subject matter of this report. Disclosure(s) apply to Coronation Merchant Bank or any of its direct or indirect subsidiaries or affiliates with respect to any issuer or the issuer's securities.

- a. The analyst(s) responsible for the preparation and content of this report (as shown on the front page of this report) holds personal positions, directly or indirectly, in securities of the company(s) to which this report relates.
- b. The analyst(s) responsible for this report as indicated on the front page is a board member, officer or director of the Company(s)
- c. Coronation Merchant Bank or its affiliates have recently been the beneficial owners of 1% or more of the securities mentioned in this report.
- d. Coronation Merchant Bank or its affiliates have managed or co-managed a public offering of the securities mentioned in the report in the past 12 months.
- e. Coronation Merchant Bank or its affiliates have received compensation for investment banking services from the issuer of these securities in the past 12 months.

- f. Coronation Merchant Bank or its affiliates expects to receive compensation for investment banking services from the issuer of these securities within the next three months.
- g. The company (s) covered in this report is a client of Coronation Merchant Bank or its affiliates.
- h. Coronation Merchant Bank has other financial or other material interest in the Company

Coronation Research's equity research rating system

Coronation Research's Investment ratings are a function of the research analyst's expectation of a stock's performance relative to relevant indices or peers. The benchmark used in deciding our stock rating is the trailing three-year average yield of the 12-month T-Bill plus one standard deviation rounded to the nearest percent.

Coronation Merchant Bank uses the following rating system:

Buy: The analyst considers the stock undervalued and expects the stock to outperform

the Benchmark over the next 12 months or the stated investment horizon.

Hold: The analyst considers the stock to be fairly valued and expects the stock to perform

in line with the Benchmark over the next 12 months or the stated investment

horizon.

Sell: The analyst considers the stock overvalued and expects the stock to underperform

the Benchmark over the next 12 months or the stated investment horizon.

Under Review (UR):

Where the company covered has a significant material event with further information pending or to be announced, it may be necessary to temporarily place the investment rating Under Review. This does not revise the previously published

rating, but indicates that the analyst is actively reviewing the investment rating or waiting for additional information to re-evaluate the expectation of the company's

performance.

Not Rated: This applies when the stock is either not covered by Coronation Research or the

rating and price target has been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Coronation Merchant Bank is acting in an advisory capacity in a merger or strategic transaction involving the company or due to factors which limits the analysts'

ability to provide forecasts for the company in question.

Price targets: Price targets reflect the analyst's estimates for the company's earnings. The

achievement of any price target may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market,

and may not occur if the company's earnings fall short of estimates.

In cases where issuing of research is restricted due to legal, regulatory or contractual obligations, publishing investment ratings will be restricted. Previously published investment ratings should not be relied upon as they may no longer reflect the analysts' current expectations of total return. While restricted, the analyst may not always be able to keep you informed of events or provide background information relating to the issuer.

If the investment rating on a stock has not been reviewed for a period of one year, coverage of the stock will be discontinued by Coronation Research. Investment decisions should be based upon personal investment objectives and should be made only after evaluating the security's expected performance and risk. Coronation Research reserves the right to update or amend its investment ratings in any way and at any time it determines.

Ratings and Price target history

	Date R	Recommen dation	Date F	Recommen dation	Date	Recomme ndation	Current price, Naira/s	Target price, Naira/s
